The specialist of educational and
sensory tools for children

Our mission

All children learn differently and our goal is to help them develop to their full potential. We wholeheartedly offer you resources, games, educational materials and quality sensory tools. We are your allies in challenges, your accomplices in daily pleasures.

The birth of our manimo: our weighted animals was the starting point of the enterprise. We saw and listened to the professional needs. We understood the parents. We acted!!

The sensory tools we created build our reputation across the country. Ever since, weighted lizards, snakes, frogs and dolphins improve daily lives for thousands of children. In addition, our strength lies in a dynamic team who listens to the needs expressed. Remarkable people use their talents to benefit our service to exceptional people like you.

Mothers and fathers understand your needs, pedagogues and educators contribute to your experience and attentive advisors are there to help you!

Our mandate is to promote children's development to their fullest potential!

(Which translates in french as "favoriser le **d**éveloppement **m**aximal de **t**ous", fdmt)

Gross Motor

Jump, run, hop, climb, rock and roll - develop gross motor skills with these colourful, fun and interactive products. Developing in infancy, gross motor skills are important for major body movements such as walking, coordination, balance, jumping, and reaching. These products encourage development of these skills while providing hours of entertainment, opportunities for interactive play, and individual growth.

Wizzy Dizzy

Watch the children smile when they move on Whizzy Dizzy and begin to turn and turn even faster! While having fun, they work their gross motor skills and hand-eye coordination. Made of durable plastic, many years of fun ahead of you! ø 55 cm X 30 cm. Maximum load 45 kg. Ages 3 +

3224000 \$ 134.⁹⁵

Carousel

Exciting mini carousel giving children a real spin! The seat is placed at a slight angle to allow the child to propel the Carousel by shifting the body's center of gravity. Thick edge to allow a good grip. Solid and stable metal base. ø 56 cm. Maximum load: 50 kg. Ages 3 to 10.

MANIMO®

We are all exposed to a multitude of stimuli every day. Some are able to manage it well, but for others, it takes more effort. Cuddly and adorable, manimo animals are there for children both in times of stress and relaxation. Their weight soothes, comforts and helps the child to better understand where their body is in space (proprioception). A manimo's heaviness creates the same sensation as deep pressure touch. Like a massage, this type of stimulation calms the nervous system, making it easier to concentrate. It also regulates behaviour and emotions.

Weighted Lizard

The weighted lizard is usually placed around the neck or on thighs. Large paws envelop the child, providing a sense of comfort and security.

- 0185-1 Blue \$ 49.⁹⁵
- 0185-2 Green \$ 49.⁹⁵
- 0185-6 Silver \$ 49.⁹⁵

2 kg

manimimo weighted animals are a sensory tool that benefit all children, but especially those with ADD, ADHD, ASD, anxiety or other disorders.

Their benefits include: :

- Bringing children comfort
- Helping children pay attention and focus
- Calming excess energy
- Being invaluable helpers for parents (and all who work with children)

2.5 kg

Weighted Frog

Enveloping and comforting, the weighted frog can be placed on thighs or chest while the child is in a prone or semi-seated position.

Weighted Dolphin

The weighted dolphin is worn draped over the shoulders or hips. Its soft, velvety fabric provides sensory comfort and is as enveloping as your child's favourite "blanky."

Being invaluable helpers for parents (and all who work with children) :

- At home (naptime, homework, bedtime, to settle down)
- At school (to relax and concentrate)
- Before or during school or after-school activities (ease anxiety before or during class)
- Before or during an outing, family activity or appointment (non-recurring anxiety-inducing event)

1 kg and 1.5 kg

Weighted Snake

Slightly lighter than the others, the weighted snake is usually placed around the neck and on the shoulders. This manimo twists and wriggles, to your child's great delight.

Protective Covers

This protective cover, available for the weighted lizard and frog, prevents stains of all kinds (saliva or other). It is ideal for educational centres or other places where a manimo will be handled by more than one child.

0276-L Lizard \$ 33.⁹⁵

0276-G Frog \$ 33.⁹⁵

Early childhood professionals, parents and teachers have long requested such a tool. Children with a learning difficulty or behavioural problem have to “get centred” to do their best.

- The animal’s weight helps by :
- Giving the child better spatial awareness
 - Calming the nervous system
 - Regulates behaviour and emotions
 - Makes it easier to concentrate

Maintenance

Cleaning your manimo could not be easier!
 Hand-wash in cold water with a mild detergent. Do not wring.
 Lay flat to dry.
 That’s it!

Because nothing is more important than your child’s safety, all manimo weighted animals meet American and European safety standards.

Sensory Solutions

The seven senses of seeing, hearing, tasting, touching, smelling, proprioception/body awareness and vestibular/balance need to work together in order to interact effectively with the environment. Sensory needs and preferences are unique to each individual. Whether you seek texture, vibrancy, softness, silence, movement or body pressure, our range of sensational products can help. From comfy chairs, cubes, balls and cushions to weighted vests, blankets and ghost - our wide selection of items will appeal to kinesthetic learners, kids on the go, or people who like to sit back and relax while taking it all in.

What is sensory integration?

Sensory integration is a neurological process. Sensory information related to our body and the environment around us is transmitted, selected, interpreted and organized by the brain, so that we can produce an appropriate behaviour or movement.

Proprioception? The proprioceptive system allows us to gather information from our muscles and joints. It plays a major role in the development of body awareness. In fact, proprioception helps us to know our body and to use it appropriately to the environment.

Vestibular? The vestibular system allows us to know our position in a space and guide the various parts of our body. It recognizes the direction and the speed of movement. It plays an important role in maintaining balance.

Misinterpretation of information from external stimuli can have an impact on attention. We experience hypersensitivity when the central nervous system interprets stimuli transmitted by our senses in an exaggerated way, and hyposensitivity when interpretation is lessened.

Attentional capacity?

It is possible to improve attention by using our senses! Moving, chewing or manipulating small objects help our body to stay awake, alert, and available for learning.

The homework period is important. It allows the child to review, in a comfortable place, the ideas learned in class and prepares the child for higher studies.

Little tricks to make the homework period enjoyable :

- Take a break between school and homework;
- Maintaining a good sitting posture requires effort so why not change positions at home during homework or reading, using a Beanbag chair or a cushion on the floor ;
- Eliminate unnecessary sensory stimulation ;
- Choose a good time/place ;
- Decrease surrounding distractions ;
- Structure this period ;
- Use tools that promote calm and concentration.

Oral Motor

Oral Motor skills involve movement of the muscles in the mouth, jaw, tongue, lips and cheeks. The coordination of these movements is needed for feeding, speech development and facial expressions. Develop a foundation with our products that target this specific group of muscles. Practice chewing, biting, sucking or simply soothe the senses. Many of these products are latex-free and dishwasher safe.

Chewable Jewelry

Our chewable jewelry is made of food grade silicone that is FDA approved and contains no phthalates, BPA, PVC, latex or lead!

Warning: This is a jewelry and NOT a toy. May require the supervision of an adult.

J'ai juste besoin de votre attention

On oublie souvent que l'anxiété et l'effet du stress affectif font partie de la vie. Pour le cerveau, il n'y a pas de bon ou de mauvais stress. Il y a du stress. Un peu. Beaucoup. Trop. Le tout est de savoir le « contenir », c'est-à-dire être capable de le vivre et d'adopter des stratégies efficaces pour le gérer. 360 pages.

Mon cerveau a encore besoin de lunettes

Le TDAH se manifeste dès l'enfance par des symptômes d'inattention, d'hyperactivité ou d'impulsivité. Les outils pour en réduire les symptômes agissent comme des lunettes pour le cerveau en l'aidant à se concentrer ou en freinant la bougeotte. Plus de la moitié des enfants atteints de TDAH en gardent des symptômes à l'âge adulte. 96 pages.

Otis et le deuil

Le deuil peut être particulièrement difficile à expliquer à un enfant neurotypique ou ayant un trouble du spectre de l'autisme. Le concept de la mort et la permanence de la perte de l'être cher sont abstraits et engendrent des émotions difficiles à décoder. Cet outil permettra de mieux comprendre cette étape de la vie. 48 pages. 5 ans +
