

Inflation Instructions for the Comfy Peapod

Follow these instructions for easy, quick setup of your Peapod. For best results, first lay your Peapod flat on a clean surface, and connect your air pump to a power outlet

1. Inflating the base

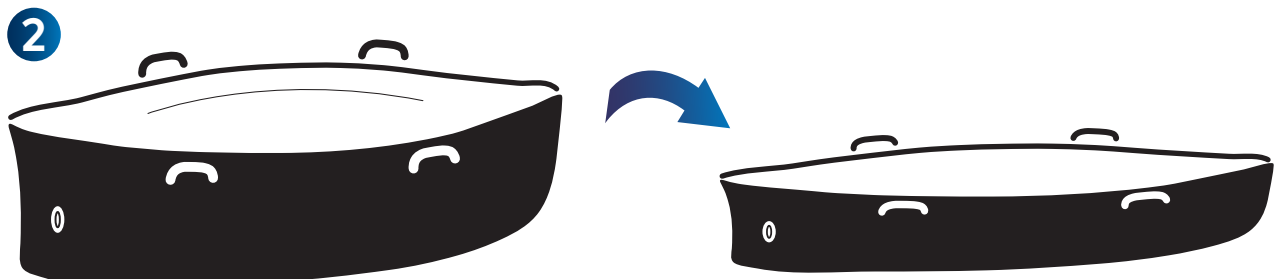

(IMPORTANT: you must inflate the base first!)

- Each stopper consists of 2 parts, the lower stopper and the upper stopper (fig A)
- Insert lower air stopper into valve opening until snug (fig B)
- Insert pump nozzle into stopper opening (fig C)
- Turn on pump and fill until firm (**do not over-inflate**)
- Turn off pump and insert final air stopper (fig D)

2. Inflating the sides

Once base is inflated, repeat steps above for each side. To deflate sides and base simply remove lower (and upper) air stopper

Comfy Peapod Care Instructions:

To clean wipe the surface with a damp cloth or sponge using soapy water and air-dry. Do not use strong chemicals or submerge in water

A repair kit is provided with instructions
Do not keep in extreme temperatures
